# LOCK AND IN-ROOM PRESENCE DETECTION SYSTEMS

Sophisticated  
European Design  
Innovative  
Exclusive  
Thoughtfully Engineered

## SALTO Systems:

Where aesthetic design meets function.

Cutting edge technology to give you an edge.

...is how our customers see our product line.

Boutique hotels secured by Salto

## WHAT IS SO EXCLUSIVE?

- Aesthetic Design.
- Size: less is MORE.
- Designer lever handle program: fits the designer lever style of your choice.
- Technology. Mag-stripe keycards were great technology in the 80s (along with 5<sup>1/4</sup>" floppy disks). How about 21st century technology like Contactless Smart-cards that use radio frequency to wirelessly unlock the door? How about hands-free keys?
- Room-key design: keycards are great, but why hand your guests the very same card a budget hotel would? Give your guests something different to enhance your guests' experience: a custom designed keyfob. Salto keycard format is available too.
- All-in-one system: Room Locks & In-room Guest Detection to enhance your guests' experience, operations efficiency and security.

## ► SystemDescription

## NETWORKED LOCKS

Hotel Access Management by Salto (HAMS)™ is a state-of-the-art electronic lock system, featuring distributed intelligence both in the lock and in the key.

Locks are networked to the computer, yet they need no wiring or WIFI infrastructure. The communication link is the intelligent key, it opens the rooms and acts as a 2-way data transporter. It gives you full control of your property - right from your PC.

## HOW?

A simple principle: keycards automatically store and convey information back and forth between locks and the PC. This is done by means of a few on-line download-points strategically located at employee areas. Employees will "touch" that online point as part of their daily routine.

## BENEFITS

- Lost key cancellation at a "click" of a mouse (no re-programming).
- Control your staff and contractors: all their activity throughout the property is automatically downloaded onto your PC via the network.
- Reporting. Use our software's "Custom Report Tool" to create your own reports:
  - Staff/contractor activity.
  - Former employees trying to access the property.
  - Out-of-shift access attempts.
  - Low battery report for maintenance.
  - "You name it..."
- Investigation tool: if you ever have a legal dispute..., chances are you may want to investigate employee/contractor activity way back (maybe years). All that information is now archived and available in your PC.
- "On-the-fly" changes to your staff/contractor access privileges (no re-programming).
- No more "my-key-doesn't-work" frustration. The keys cannot de-magnetize, they are simply not magnetic.

## CONTACTLESS SMART CARD TECHNOLOGY

You know smart cards. Now imagine you don't need to touch the door to unlock it. It can even become a "hands-free" operation (\*).

Both the key and the lock have a built-in antenna to perform a 2-way communication.

Communication is performed via FCC compliant 13.56 MHz radio frequency.

Keys are compliant with ISO standards.

The keys can now take any shape. No need to stick to the traditional keycard format, after all you are not offering a traditional room either.

Extreme abuse resistance: water, salt, heat/cold, dust...

Battery-free operation: keys use the locks' power to transmit and store information.

Reusable: keys can be reprogrammed over and over again.

## IN-ROOM GUEST DETECTION SYSTEM

Your guest expects more, we help you beat that expectation.

Each guestroom is equipped with a cardholder on the entrance wall. The on-line cardholders read keycards and transmit guest or staff presence information to the PC, thus providing you with valuable real time information to manage your staff and serve your guest.

Contactless Keyfob

### BENEFITS

- Guest in-room detection:
  - Guest locator.
  - Don't knock on the door to check if the guest is in. Just "click" your mouse.
  - Plan your cleaning and maintenance work without disturbing your guests.
  - Important input for your hotel marketing.
- Staff/Contractor locator.
- Staff/Contractor "time-spent-per-room" report to help your operations efficiency.
- List of "cleaned-&-checked" rooms (ready for check-in)
- Optional minibar module: Lists replenished minibars. Automatically locks/unlocks minibars to prevent minors' or unauthorized staff usage.
- Energy conservation option: automated A/C & Light control for **unsold rooms**.

► **SystemComponents**

**NETWORKED ELECTRONIC LOCKS**

Contactless Radio-wave key opening.  
Perpetual Clock & Calendar.  
2-way communication with PC.  
Solid Stainless Steel or Brass construction.  
Bolt-on installation, no wires required.  
Battery powered.

**ON-LINE ACCESS POINT READERS (DOWNLOAD-POINTS)**

Surface mounted.  
Ethernet/WIFI connectivity.

**IN-ROOM CARDHOLDER**

Real time "In-room Presence Detector". Know who is in: guest, staff, contractor, ...  
Surface mounted.  
Reads keys.

**FRONT DESK EQUIPMENT**

Management Software. PMS & POS interfaces.  
Key encoder.  
Hand held lock programmer: maintenance tool, emergency opening, ...
